EXPERIENCE

Software Engineer

Aug 2024 - Present

5Paisa Capital (*Fintech, Trading*)

HSR Layout, Bengaluru

- Contributed to the complete overhaul of the core trading system, halving end-to-end processing latency through in-process Go-C++ integration, optimized caching, and architectural improvements to event-driven execution flows, powering a production platform serving 2 lakh+ users.
- Designed and developed scalable REST APIs for trade order execution, funds management, and report generation, enabling reliable, low-latency trading operations.
- Engineered a Go-C++ interoperability layer using cgo, enabling direct in-process invocation of the native C++ trading library and eliminating network-based IPC overhead from the critical execution path.
- Developed a concurrent real-time data processing application using Go goroutines and channels to consume Stock Exchange Network (SEN) feeds, deriving market statistics and graphical insights for end users.
- Built a stream-based data delivery feature using the Pub/Sub model for efficient, low-latency updates to clients.
- Tech Stack: Spring Boot, Java, Go, Redis, Kafka, PostgreSQL*

Software Engineer Intern

Jul 2023 - Dec 2023

Acceldata Technology (*SaaS Data Observability Platform*)

HSR Layout, Bengaluru

- Developed multiple REST APIs using Spring Boot and SQL for an internal portal to monitor builds, version deployments, and quality metrics across environments.
- Automated role-based access control (RBAC) via REST APIs, streamlining user provisioning and tightening security.

EDUCATION

BITS Pilani, Hyderabad Campus

Hyderabad, TS

B.E. (Major) in Electrical and Electronics Engineering | Minor in Computing and Intelligence

2020 - 2024

TECHNICAL SKILLS

Languages: Go, Java, C++, SQL

Frameworks: Spring Boot, Gin, cgo

Infrastructure & Tools: Git, Redis, Kafka, PostgreSQL, WebSocket

Coursework: Data Structures & Algorithms, OOP, DBMS, Artificial Intelligence, Operating Systems

PROJECTS

Online Food Ordering Platform | *Spring Boot, MySQL, HTML/CSS/JS*

- Full-stack web app for browsing, ordering, and tracking food orders, with an admin module to manage users, products, and stock.

Property Rental Marketplace | *ReactJS, Node.js/Express, MySQL*

- Web app enabling users to search properties, submit rental applications, and manage rental agreements online.

ACHIEVEMENTS

Best Performer Award | *5Paisa Capital, FY 2025-26*

- Recognised for outstanding contributions to the trading platform engineering team.
